

Daniel Raban

SENIOR SOFTWARE ENGINEER

danieltraban@gmail.com
07852889899
London, United Kingdom

TypeScript · React · Angular · Node.js · AWS

PROFILE

Full-stack software engineer with 15 years of experience building customer-facing web applications with TypeScript, React, Angular, and Node.js across AWS, Azure, and Google Cloud. I specialise in modernising legacy systems, designing modular architectures, and leading teams through delivery. Recent work spans micro frontends, infrastructure as code, and AI-assisted development workflows.

SKILLS

LANGUAGES	TypeScript · Python · Java · HTML & CSS
FRAMEWORKS	Angular · React · Node.js · Next.js
DATA & CLOUD	SQL/NoSQL · AWS · Azure · Google Cloud · Terraform · Kubernetes · CI/CD
PRACTICES	Test-driven development · Git
AI TOOLING	Claude Code · Cursor · Model Context Protocol (MCP) · AI Agents · Prompt Engineering

EMPLOYMENT HISTORY

Senior Software Engineer, Virgin Media Group - London

Jun 2024 - Present

- Lead an Agile team delivering customer-facing web applications and modernising legacy systems.
- Built modular frontend and backend features with React, Next.js, Node.js, TypeScript, and Storyblok, improving scalability and SEO.
 - Designed and integrated Node.js service endpoints and API-driven workflows connecting the UI, CMS, and internal systems.
 - Re-architected core application flows and rewrote legacy code into independently deployable micro frontends now live in production.
 - Provisioned AWS infrastructure with Terraform across EC2, S3, Lambda, CloudFront, and RDS, supported by CI/CD pipelines.
 - Applied Angular 18, TypeScript, and React best practices, with unit and end-to-end testing supporting maintainable releases.
 - Adopted AI-assisted development workflows with Claude Code and Cursor, including subagents, MCP integrations, and project memory.

Senior Software Engineer, Builder.ai - London

Oct 2023 - Mar 2024

- Developed scalable features using Angular, React, TypeScript, Node.js, and Ruby on Rails.
- Contributed Node.js service logic and API integrations and deployed application infrastructure on AWS.
- Built CI/CD pipelines, strengthened Jest coverage, and improved RxJS asynchronous state and component patterns.
- Provided technical leadership through code reviews, pair programming, team meetings, and product demos.

Senior Software Engineer, The Home Depot - Atlanta, GA

Jul 2021 - Aug 2023

- Retired legacy systems and transitioned functionality to modern user interfaces and microservices.
- Designed a high-traffic application for Major Appliances, Protection Plans, and Parts & Services, supporting billions in transaction volume.
- Deployed and scaled services on AKS and GKE with autoscaling and load balancing for peak demand.
- Achieved 95% UI code coverage and 90% microservice coverage and shipped critical reliability fixes.

Lead Software Engineer, Hathway - Atlanta

Oct 2020 - Jul 2021

- Led multiple teams specialising in Angular and native applications in the food-ordering sector.
- Led development using TypeScript, Angular, NGRX, RxJS, AWS, Node.js, Ionic, Cordova, and Capacitor.
 - Deployed and monitored AWS services with autoscaling and load balancing during high-order-volume periods.
 - Drove adoption of TDD, CI/CD, and Agile practices and guided teams in decomposing features into user stories.
 - Contributed to applications for Panda Express, Raising Cane's, Hardee's, and Carl's Jr.

Senior Software Engineer (Contract), Boehringer Ingelheim

Jun 2020 - Oct 2020

- Led an Angular upgrade for a legacy application using TypeScript, Angular, Karma, Jasmine, Ionic, and Cordova.

Senior Software Engineer 1, CallRail - Atlanta

Aug 2018 - Jun 2020

- Contributed to a fast-paced SaaS startup building call-tracking and analytics products.
- Helped a three-engineer team launch a new product that generated more than \$1M in annual recurring revenue.
 - Worked daily with Ruby on Rails, RSpec, Angular, TypeScript, Elasticsearch, Docker, CSS, HTML5, and GitHub.

- Built reporting algorithms, APIs, and third-party integrations supporting core product growth.

Software Engineer, NetTracer - Atlanta, GA

Mar 2018 - Aug 2018

Led UI development for the modernisation of a legacy lost-baggage tracing platform used by major airlines including American, Delta, and Southwest.

- Developed a new Angular 6 user interface and established frontend patterns for the application.
- Integrated REST APIs and backend services using Angular and Node.js.
- Worked with AWS and Jenkins CI/CD and developed end-to-end tests with Protractor.
- Used MySQL, npm, Yarn, Bootstrap, HTML5, and CSS3 across delivery.

Senior Software Engineer, The Home Depot - Atlanta, GA

Nov 2016 - Feb 2018

Worked across internal Automation and HR engineering teams, building applications used across The Home Depot's store network.

- Automation Team: developed an internal UI for analysing operational and network data and submitting support requests using AngularJS, Angular Material, and D3.js.
- Built REST API and Node.js integrations with Redis caching; worked with Concourse CI/CD, Webpack, npm, Gulp, Karma, and Jasmine.
- HR & Paperless Onboarding Team: developed a React application supporting hiring and paperless employee onboarding across stores.
- Helped replace paper onboarding with secure digital workflows, including improved handling of sensitive applicant information.
- Built and tested React functionality with Jest and Enzyme, deployed through PCF.
- Led React and Node.js development and taught other developers how to work effectively with both technologies.

Software Engineer, Make and Build - Atlanta, GA

Jul 2014 - Aug 2016

- Built responsive client-facing applications with Angular and Ruby on Rails, working with product and design to turn business needs into shipped web features.

Frontend Software Engineer, Blacqube - Atlanta, GA

Mar 2012 - Jun 2014

- Developed pixel-perfect frontend experiences for Mercedes-AMG alongside UI/UX teams, with strong attention to animation and visual fidelity.

Software Engineer, FAB (First Artist Bank) - Atlanta, GA

Jan 2011 - Mar 2012

- Built a mobile-friendly application with Angular and PhoneGap for artists and musicians to manage and monetise their work.

EDUCATION

Computer Science (BSc coursework), University of Portsmouth - Portsmouth, United Kingdom

Sep 2007 - Jun 2009

Two years of BSc Computer Science coursework focused on web development, Python, mathematics, and Java.
